Leslie Svacina said that when she started her on-farm business about two years ago, Cylon Rolling Acres near Deer Park in St. Croix County, she wasn't able to find much research or best management practices specific to the meat goats that are part of her managed rotational grazing program. There was also no industry group in Wisconsin for meat goat producers.

Svacina's idea was to launch the Wisconsin Meat Goat Network as a website that would bring together producers and information for what she feels is a growing industry.
